

Enhanced Program Architecture

Introducing Added Qualifications

Scrum Alliance Enhanced Program Architecture

What is an Added Qualification?

An Added Qualification:

- Is a complex topic that builds on Scrum foundations
- Has a set of standard learning objectives that is approved and maintained by Scrum Alliance
- Has an assessment
- May have a CSM or CSPO as a prerequisite
- Must be a minimum of 2 days and taught in person
- Must be listed on the Scrum Alliance site
- Enhances a CSM or CSPO credential to a CSM+ or CSPO+
- Has a per-student fee
- Provides SEUs toward CSP and maintenance of certifications

Benefits of the Enhanced Program Architecture and Added Qualifications

- Provide a flexible model to add complex and relevant topics quickly to meet market demand
- Provide additional education opportunities for members
- Provide additional teaching opportunities for trainers

Who gets a + ?

When a member with the appropriate prerequisite completes ANY Added Qualification course, their core, introductory level certification is promoted to a “+” certification.
